## Investment approach

The Fund's investment objective is to seek capital appreciation. The Fund seeks this objective by allocating its assets among a variety of discretionary sub-advisers with experience managing non-traditional or "alternative" investment strategies. Blackstone is responsible for selecting the strategies, for identifying and retaining sub-advisers, and for determining the amount of Fund assets to allocate to each strategy and to each sub-adviser. Blackstone may also manage a portion of the Fund's assets directly.

## Fund highlights

Fund Assets (Mn)	\$1,607.12
NAV per Share	CHF 9.66
Currency	CHF
Share Class Inception Date	April 8, 2015
Investment Manager	Blackstone Alternative Investment Advisors LLC
Subscriptions	Daily
Redemptions	Daily
Distributing/Accumulating	Accumulating
Cut-off	3pm (Ireland)
Bloomberg Ticker	BXDMSIC ID
ISIN	IE00BN8SY932

## Fund Terms – Share Class I (CHF) Acc.<sup>(5)</sup>

Minimum Initial Investment (Mn)	CHF 5.00
Management Fee	1.40%
Performance Fee <sup>(6)</sup>	15.00%
Other Expenses <sup>(7)</sup>	Capped 0.45%

(1) Fund performance is shown net of all fees and expenses. Past performance may not be a reliable guide to future performance. The value of Fund shares may go down as well as up and there can be no assurance that the Fund will achieve its investment objectives or avoid significant losses. Performance is estimated and unaudited for 2016. Net performance for the Fund as well as indices is from 4/8/15 to 8/31/16 and is annualized.

(2) The indices presented are indicative and for illustrative purposes only. The volatility of the indices presented may be materially different from that of the performance of the Fund. In addition, these indices employ different investment guidelines and criteria than the Fund; as a result, the holdings in the Fund may differ significantly from the securities that comprise the indices. The performance of these indices has not been selected to represent an appropriate benchmark to compare to the performance of the Fund, but rather is disclosed to allow for comparison of Fund performance to that of well-known and widely recognized indices. A summary of the investment guidelines for these indices is available upon request. In the case of equity indices, performance of the indices reflects the reinvestment of dividends. Beta and Alpha represents BXDMSIC compared to the specific indices. Standard deviation and Sharpe calculations are annualized. All Inception to Date Statistics are calculated using daily performance since Inception.

(3) Performance is presented through August 31, 2016. Performance is estimated and unaudited for 2016. Net performance is net of all fees and expenses. Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost and current performance may be lower or higher than the performance data quoted. Additional information and current performance data is available at [www.blackstone.com/bxdms](http://www.blackstone.com/bxdms). BXDMSIC launched on April 8, 2015 and thus performance for April 2015 is limited to April 8 through April 30.

(4) The portfolio allocations in the table reflect allocations as of the date of the report. The Fund may shift allocations among sub-advisers, strategies and sub-strategies at any time. Further, Blackstone, on behalf of the Fund, may determine to not employ one or more of the above-referenced sub-advisers, strategies or sub-strategies. Blackstone may also add new sub-advisers, strategies or sub-strategies. Accordingly, the allocations are presented for illustrative purposes only and should not be viewed as predictive of the ongoing composition of the Fund's portfolio (and its sub-advisers), which may change at any time.

(5) The above terms are summarised and qualified in their entirety by the more detailed information set forth in the UCITS prospectus and supplement.

(6) The Fund will pay to Blackstone a performance fee equal to 15% of any returns the relevant class achieves above any losses carried forward from previous periods. The Fund may also pay to Blackstone an additional performance fee equal to the amount of any performance fees owed by Blackstone to the sub-advisers. Any such additional performance fee will be deducted from Blackstone's performance fee before it is paid in subsequent quarterly performance periods. The performance fee together with any additional performance fee are subject to a cap of 4.95% of the NAV of the class.

(7) Blackstone has agreed to reimburse the Fund so that certain of the Fund's "Other Expenses" will not exceed 0.45% annually. Please see important disclosure information at the end of this document for further explanation.

(8) Blackstone Senfina Advisors L.L.C. "Senfina" is an indirect wholly-owned subsidiary of The Blackstone Group L.P., a publicly traded master limited partnership that has units that trade on the New York Stock Exchange under the symbol "BX." Senfina is an affiliate of BAIA, the Fund's investment adviser, on the basis that it is under common control with BAIA. The investment by BXDMS with Senfina benefits Blackstone and a withdrawal from Senfina would be detrimental to Blackstone.

(9) Sub-adviser is not currently managing any Fund assets. Allocations may change at any time without notice.

(10) BAIA manages a portion of the Fund's assets directly. Such assets ("BAIA-Direct") include allocations to a risk premia trading strategy and may also include collective investment schemes and/or opportunistic trades. BAIA's fees on directly managed assets are not reduced by a payment to a sub-advisor.

- Sub-strategy performance is shown gross of all fees and expenses. Performance is estimated and unaudited.
- Fund performance is shown net of all fees and expenses. Past performance may not be a reliable guide to future performance. The value of Fund shares may go down as well as up and there can be no assurance that the Fund will achieve its investment objectives or avoid significant losses. Performance is estimated and unaudited for 2016. Net performance for the Fund as well as indices is from 4/8/15 to 8/31/16 and is annualized. ITD net return is cumulative not annualized.
- Performance contribution represents the contribution of each strategy or sub-strategy to the Fund's total return. Performance contribution is shown gross of all fees and expenses.
- In the case of non-interest rate instruments, exposure data represents the delta adjusted market value. In the case of interest rate products, exposure data is represented by the 10-year equivalent instrument. Positions of unknown type (if any) are excluded from exposure data. Data is obtained from State Street Fund Services (Ireland) Limited, the administrator for the Fund. The Fund does not guarantee the accuracy of such data.
- Sub-strategy allocations exclude exposures to Fund level cash, hedging and expenses and are adjusted pro-rata to equal 100%.
- The indices presented are indicative and for illustrative purposes only. The volatility of the index presented may be materially different from that of the performance of the Fund. In addition, the index employs different investment guidelines and criteria than the Fund; as a result, the holdings in the Fund may differ significantly from the securities that comprise the index. The performance of the index has not been selected to represent an appropriate benchmark to compare to the performance of the Fund, but rather is disclosed to allow for comparison of the Fund's performance to that of well-known and widely recognized index. A summary of the investment guidelines for the index presented is available upon request. Performance of the index reflects the reinvestment of dividends. Please see glossary of terms at the end of this presentation for index definitions.
- Information is for BXDMSKE, the BXDMS share class with the longest track record. MSCI World represents MSCI World (EUR-Hedged) to be consistent with BXDMSKE currency. Please see the additional disclosure on the last page for additional index definitions.

## August Market Commentary

August proved to be a particularly calm month for equity markets, with U.S. stocks exhibiting their narrowest monthly trading range since 1965, as trading volumes came down and volatility remained low. While this range-bound behavior could be linked to seasonal effects, it also may be indicative of growing investor complacency, despite potential volatility ahead that could stem from topy equity valuations and divergent central bank action.

Turning to U.S. monetary policy, market sentiment has swung back and forth several times this year around the timing of the next rate hike following the initial increase last December. In August, the Federal Reserve Bank of Kansas City hosted its annual Economic Symposium in Jackson Hole, a conference in which various Federal Reserve (“Fed”) officials, central bankers, finance ministers and academics debate economic issues impacting U.S. and global economies. During the conference, Fed Chair Janet Yellen, along with other Fed officials, indicated that another rate hike was possible before year end, subject to the strength of economic data. Investors will be focused on the September 21-22 meetings for additional signals around future monetary policy action.

Within fixed income, anticipation of a potential rate hike caused short-term U.S. government bond yields to rise, producing modest losses, while high yield markets saw another month of strong returns as muted volatility helped support risk-on sentiment within the fixed income universe, with CCC and B-rated credits rallying. After plunging in July, Oil bounced back in August as traders reacted to inventory data and speculation around whether OPEC and other major oil producers will curtail oil production.

While U.S. equity markets finished August slightly positive, there was dispersion at the underlying sector level. Unlike the first half of the year, where sectors such as Utilities and Telecom outperformed while Financials and Technology sectors lagged, August saw the opposite trend, with the latter outperforming the former. In the U.K., stock markets continued their somewhat surprising rally in August even as the British Pound weakened versus the U.S. Dollar and several other major currencies. Emerging market (“EM”) equity and fixed income markets also had a strong month, as Olympic-sized flows poured into EM credit and investor sentiment around political developments improved.

## Review of Fund Performance

The investment objective of Blackstone Diversified Multi-Strategy Fund (the “Fund”) is to seek capital appreciation. The Fund aims to achieve its objective by allocating assets among Blackstone and a variety of investment sub-advisers, each with experience managing non-traditional or “alternative” investment strategies. In August, the Fund’s Class I (USD) share class returned -0.39%<sup>1</sup> net of fees and expenses versus 0.13% and -0.49% for the MSCI World and Barclays Global Aggregate Bond Index, respectively<sup>2</sup>. For a summary of Fund performance of the share class to which this report relates, please refer to the “Investment Summary” section of this report.

- 
1. Performance is shown net of all fees and expenses for Share Class I (USD). Past performance may not be a reliable guide to future performance. The value of shares may go down as well as up and there can be no assurance that the Fund will achieve its investment objectives or avoid significant losses. Performance is estimated and unaudited.
  2. The indices presented are indicative and for illustrative purposes only. The volatility of the indices presented may be materially different from that of the performance of the Fund. In addition, these indices employ different investment guidelines and criteria than the Fund; as a result, the holdings in the Fund may differ significantly from the securities that comprise the indices. The performance of these indices has not been selected to represent an appropriate benchmark to compare to the performance of the Fund, but rather is disclosed to allow for comparison of Fund performance to that of well-known and widely recognized indices. A summary of the investment guidelines for these indices is available upon request. In the case of equity indices, performance of the indices reflects the reinvestment of dividends.

### ***Equity Strategies***

Equity strategies detracted from performance during the month, driven primarily by Q2 earnings misses across certain exposures. Equity Long/Short sub-strategies contributed slight gains while Equity Market Neutral sub-strategies underperformed. Within Equity Long/Short, Financials and select Technology and Consumer exposures generated positive alpha on the long side of the portfolio, while certain Healthcare exposures suffered in concert with selling pressure in the space driven by a combination of controversial news events. Equity Market Neutral sub-strategies were also impacted by weakness in the Healthcare sector, in addition to weakness in certain Industrial names. Given the current environment, we maintain our cautious view of equity markets going forward.

### ***Credit Strategies***

Credit strategies were the largest contributor to the Fund's performance in August, with all Credit sub-strategies contributing gains. Distressed credit exposures saw strong performance as settlement resolutions and deal enhancements caused a rally across certain loans and bonds. Government-sponsored enterprise ("GSE") credit risk transfer bonds and certain asset-backed credit exposures also experienced gains driven by positive carry and higher mark-to-market moves. On the Corporate Credit side, gains came from price appreciation in Natural Resources and Financials exposures.

### ***Multi-Asset Strategies***

Multi-Asset strategies detracted from performance in aggregate, with Discretionary-Thematic and Multi-Strategy sub-strategies contributing gains. Improved investor sentiment around EM markets benefitted various EM equity exposures within the Fund, while positive developments concerning fiscal reform in Latin America caused spreads to tighten, supporting EM debt exposures. While Systematic sub-strategies were mixed, they detracted on the margin, as a factor rotation out of low volatility strategies that had supplemented performance in the first half of the year weighed on performance in August. We continue to view EM as relatively attractive when compared to developed markets, and we are focused on Brazil, Argentina, Greece and Venezuela in particular. Specifically, we see the potential for opportunity when there is a divergence between the actual price and the price implied by fundamentals of certain sovereign and quasi-sovereign entities that have experienced significant pressure at the hand of lower commodity prices over the last 12-18 months.

---

Fund may differ significantly from the securities that comprise the indices. The performance of these indices has not been selected to represent an appropriate benchmark to compare to the performance of the Fund, but rather is disclosed to allow for comparison of Fund performance to that of well-known and widely recognized indices. A summary of the investment guidelines for these indices is available upon request. In the case of equity indices, performance of the indices reflects the reinvestment of dividends.

All investors should consider the investment objectives, risks, charges and expenses of Blackstone Diversified Multi-Strategy Fund (BXDMS) carefully before investing. The Key Investor Information Document ('KIID'), Prospectus and Supplement contain this and other information about BXDMS and are available on the Blackstone website at [www.blackstone.com/BXDMS](http://www.blackstone.com/BXDMS). All KIIDs are available in English, and certain share class specific KIIDs are available in French, German, Dutch, Danish, Finnish, Swedish, Norwegian, Spanish and Italian as indicated on the Blackstone website. All investors are urged to carefully read the Prospectus, Supplement and KIID in their entirety before investing.

#### **Glossary of Terms:**

**Beta:** A measure of the volatility, or systemic risk, of a security or a portfolio in comparison to the market as a whole.

**Standard Deviation:** A measure of the dispersion of a set of data from its mean. The more spread apart the data, the higher the deviation. Standard deviation is calculated as the square root of variance.

**Alpha:** A risk-adjusted performance measure that represents the average return on a portfolio over and above that predicted by the capital asset pricing model (CAPM), given the portfolio's beta and the average market return.

**Sharpe Ratio:** A ratio to measure risk-adjusted performance. The Sharpe Ratio is calculated by subtracting the risk-free rate – such as that of the 10-year U.S. Treasury bond – from the rate of return for a portfolio and dividing the result by the standard deviation of the portfolio returns. The greater a portfolio's Sharpe Ratio, the better its risk-adjusted performance has been.

**Delta:** The ratio comparing the change in the price of the underlying asset to the corresponding change in the price of a derivative.

**Gross Exposure:** Reflects the aggregate of long and synthetic short investment positions in relation to the net asset value. For example, if BXDMS has 60% long exposure and 50% synthetic short exposure to a particular asset class, then BXDMS has 110% gross exposure to that asset class. The gross exposure is one indication of the level of leverage in a portfolio.

**Net Exposure:** This is the difference between long and synthetic short investment positions in relation to the net asset value. For example, if BXDMS has 60% long exposure and 50% synthetic short exposure to a particular asset class, then BXDMS is 10% net exposure to that asset class.

**Long:** A long position occurs when an individual owns securities.

**Synthetic Short:** Short selling an underlying security through the use of derivatives. Synthetic Short positions can generate returns when the price of the underlying security declines.

**VaR:** A statistical technique used to measure and quantify the level of financial risk within a firm or investment portfolio over a specific time frame. Value at risk is used by risk managers in order to measure and control the level of risk which the firm undertakes. The risk manager's job is to ensure that risks are not taken beyond the level at which the firm can absorb the losses of a probable worst outcome.

#### **Glossary of Indices:**

Market indices obtained through Bloomberg. Indices are presented for illustrative purposes only, are unmanaged and investors cannot invest in an index. The volatility of the indices presented may be materially different from that of the performance of BXDMS. In addition, the indices employ different investment guidelines and criteria than BXDMS; as a result, the holdings in BXDMS may differ significantly from the securities that comprise the indices. The performance of the indices has not been selected to represent an appropriate benchmark to compare to the performance of BXDMS, but rather is disclosed to allow for comparison of BXDMS performance to that of well-known and widely recognized indices. In the case of equity indices, performance of the indices reflects the reinvestment of dividends.

**Barclays Global Aggregate Bond Index (CHF-Hedged):** provides a broad-based measure of the global investment grade fixed-rate debt markets. It is comprised of the U.S. Aggregate, Pan-European Aggregate, and the Asian-Pacific Aggregate Indexes.

**MSCI World Index (CHF-Hedged):** A market capitalization weighted index designed to provide a broad measure of equity-market performance throughout the world. The MSCI World is maintained by Morgan Stanley Capital International, and is comprised of stocks from all the developed markets in the world.

#### **Important Disclosure:**

Blackstone has agreed to waive its fees and/or reimburse expenses of the Fund so that "Other Expenses" will not exceed 0.45% (annualized). For this purpose, "Other Expenses" includes all expenses incurred in the business of the Fund other than (i) establishment expenses relating to the Fund; (ii) investment management fees; (iii) Performance Fees or Additional Performance Fees; (iv) distributor fees; (v) Eligible Collective Investment Scheme fees and expenses, (vi) brokerage and trading costs, (vii) interest payments, (viii) taxes, and (ix) extraordinary expenses. Blackstone may terminate or modify this arrangement at any time in its sole discretion upon 30 days' notice in writing to the Fund's shareholders.

#### **Important Risks:**

There can be no assurance that BXDMS will achieve its investment objective. It should be appreciated that the value of Shares may go down as well as up. An investment in a Fund involves investment risks, including possible loss of the entire amount invested. The capital return and income of BXDMS is based on the capital appreciation and income on the investments it holds, less expenses incurred. Therefore, the Fund's return may be expected to fluctuate in response to changes in such capital appreciation or income. The following is a summary description of certain principal risks of investing in BXDMS:

- General economic and market conditions can affect the price and volatility of investments.
- The success of the Fund depends upon BAIA's skill in determining the Fund's allocation to alternative investment strategies and in selecting the best mix of sub-advisers. There can be no guarantee that sub-advisers will stick to the Investment strategy for which they were selected, or that these strategies will be successful.
- Sub-advisers may make investment decisions which conflict with each other; for example, sub-advisers may hold economically offsetting positions or may purchase or sell the same security at the same time without aggregating their transactions. This may result in unnecessary brokerage and other expenses and the Fund may incur losses as a result.
- Some of the sub-advisers selected may hold only a small number of investments, or assets that move closely in line with assets held by other sub-advisers.
- The Fund's investments will include shares, bonds and FDI. Each of these will be exposed to the risks specific to the type of asset in question. In particular, the use of FDI may result in substantial gains or losses that are greater in magnitude than the original amount invested.
- The Fund may invest in countries with a weak legal or financial framework where it can be hard to enforce ownership rights or repatriate funds.
- The Fund may invest in currencies other than its base currency. The success of measures to protect the Fund or a Class against currency movements cannot be certain.
- Changes in exchange rates may have an adverse effect on the value price or income of the product.
- The Fund may invest in FDI that derive their value from other assets in the expectation of making a profit if the price of the assets falls; theoretically, this could result in an infinite loss.
- The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Low trading volumes, lack of buyers, large positions or legal restrictions may limit or prevent the Fund from selling particular assets quickly and/or at desirable prices.

For further information on the risks faced by the Fund, see "Risk Factors" in the Prospectus and Supplement for the Fund, available from [www.blackstone.com/BXDMS](http://www.blackstone.com/BXDMS)
